

# Revokable-T — Electronic Press Kit (EPK)

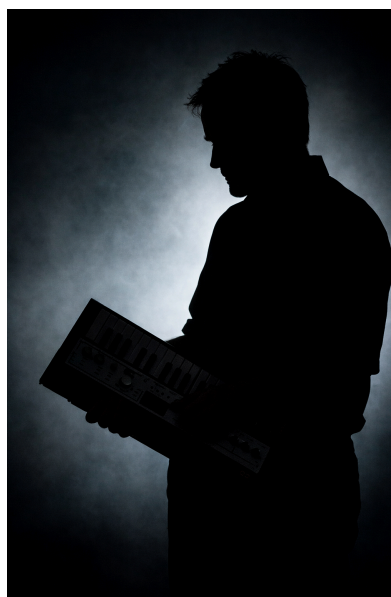

Prepared for: **Night Beams**

## Artist Description

Revokable-T is a solo electronic music unit that blends live instruments with modular synths, samplers, and real-time effects. The goal is to explore the space between acoustic and digital sound using tools like trumpet, electro-acoustic gear, and evolving synthesis setups.

Influenced by electronica, nu-jazz, and synthwave, each performance is built live, integrating both structured composition and improvisation. As new technologies and instruments become available, the setup (and the sound) continues to evolve.

## Music

Debut Single: Gravity

Anticipated release window: February 2026 (TBC)

Teaser video: <https://revokable-t.com/video/gravity-teaser.mp4>

## Live Performance — Night Beams18

Revokable-T performs as a fully live electronic set combining modular synthesis, sampling, live brass, and real-time effects. Designed for immersive, low-light listening environments.

Set Length: 25 minutes

Format: Solo live electronic performance
